

TERRACE AREA INTEGRATED SOLID WASTE MANAGEMENT PROGRAM

NEW – Food Scrap Separation (Organics)

Material Restrictions

The Thornhill Transfer Station and the Forceman Ridge Waste Management Facility are scheduled to open in fall 2016. Some materials currently accepted at existing facilities, including food scraps, and yard and garden waste will be restricted prior to the opening of the new Transfer Station. In the future, these materials will not be landfilled; instead food scraps will be collected at the Thornhill Transfer Station and composted at the Forceman Ridge Composting Facility.

Source Separation

Industrial, Commercial & Institutional (IC&I) businesses in the Terrace area will be expected to source separate organics from their general waste. Food scraps and yard waste will be consolidated at the Thornhill Transfer before being transported to Forceman Ridge Composting Facility. The current cost for disposal is \$99/tonne at the Thornhill Transfer Station.

Diversion Options

Local haulers are aware of these changes. Please contact your current service provider to inquire if they will be offering collection of organic materials from your business.
